

# Beadalon®

# The Best of the Basics

Innovation, Quality, and Expertise in Jewelry Making for Nearly 50 Years

At Beadalon, we don't aim to provide everything. We focus on what matters most - exceptional quality and innovation. Unlike wholesalers, we are a factory and the only company in the industry that manufactures its own flexible bead stringing wires, wire wrapping wire, and memory wire in-house in the USA.

We proudly offer a curated selection of premium-quality wires, cords, tools, and stringing supplies, designed exclusively for DIY jewelry making enthusiasts and professionals. With nearly five decades of experience, we carry everything you need to create beautiful jewelry, except the beads.

And while wire is our specialty, Beadalon is much more than just a wire factory. We are a passionate team dedicated to elevating the craft of jewelry making through innovation, education, and best-in-class products. Many of our products are unique, developed from scratch and are not sold under other brands. Though our ideas are often imitated, our quality and value remain unmatched.

Make better jewelry with Beadalon!

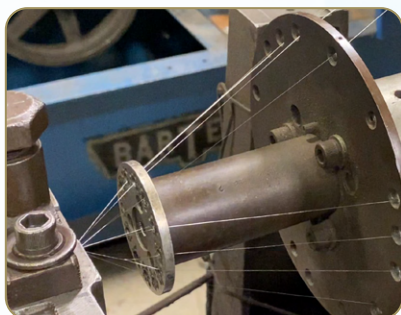

Trust the experts. Buy your beads from a bead company.  
Buy your wire and supplies from the one-and-only true wire factory - Beadalon.

- ◆ Crafting high-quality jewelry wire and cords since 1976.
- ◆ Nearly 50 years of leadership in the beading and jewelry-making industry.
- ◆ Trusted globally for innovation, quality, and strong international brands.
- ◆ Offering premium products, many proudly manufactured in the USA.
- ◆ Unique, innovative designs—distinct from mass-produced imports.
- ◆ Pioneers in DIY jewelry education, providing expert tutorials and resources.
- ◆ In-depth knowledge of evolving jewelry trends and fashion cycles.

**Beadalon®**

Life is what you *make* it.

# Manufacturing Wire in the USA Since 1976

# String it once... Wear it a Lifetime

Beadalon miniature bead stringing cable combines the softness and flexibility of thread with the strength and durability of stainless steel. Jewelry made on Beadalon wire is designed to last a lifetime - it's the perfect first choice for stringing designs!

Beadalon Bead Stringing Wire is composed of tiny wires twisted together and nylon coated. The number of tiny wires, also known as strands, determines the flexibility of the wire. The larger the number of strands, the more flexible the wire will be. Therefore, 49 strand is more flexible than 19 strand, and 19 strand is more flexible than 7 strand. When choosing which type of wire to use, consider the amount of drape you want your design to have. 49 strand wire is very supple and will drape elegantly, giving your designs a thread-like appearance. 7 strand wire is not as flexible, but will hold its shape better. If you are new to bead stringing or unsure how much flexibility you require, we recommend starting with our middle grade, 19 strand wire.

## 49 Strand

FLEXIBILITY GOOD BETTER **BEST**

*Our highest quality wire, Beadalon 49 Strand is the wire with the best flexibility. It is the preferred wire for professional designers who demand premium strength, softness, and flexibility.*

## 19 Strand

FLEXIBILITY GOOD **BETTER** BEST

*Beadalon 19 Strand exhibits better flexibility than Beadalon 7 Strand. Beadalon 19 Strand is the perfect combination of strength, flexibility, and price. Available in a wide variety of sizes and colors.*

## 7 Strand

FLEXIBILITY **GOOD** BETTER BEST

*Good for general beading projects, Beadalon 7 Strand is economically priced, stronger than Tiger Tail, and has an excellent variety of sizes and colors.*

# Benefits of Beadalon Wire

Beadalon Wire labels clearly indicate the proper size Crimp Beads and Crimp Tube sizes that will fit. Simply match the number on the Beadalon Crimp Beads/Tubes package to get a perfect fit!

Back labels for 19 & 49 Strand have charts indicating which Beadalon findings work with each diameter of wire.

-  **Supple & Kink Resistant** – The higher the number of strands, the softer and more threadlike, i.e. our 49 Strand is the softest wire.
-  **Abrasion Resistant** - The wire protects against sharp crystal, gemstone, glass, and metal beads.
-  **Knottable** - Ties easily like thread.
-  **100% Waterproof** - Stainless Steel withstands fresh and saltwater exposure.
-  **UV Resistant** - Will not deteriorate in sunlight.
-  **Versatile** - A wide range of diameters, flexibilities, and colors.

# Wire Diameters & Uses

Actual Size	Wire Diam. mm	Strand			RECOMMENDED USES
		49	19	7	
	.010 in (0.25 mm)		●	●	.010" Seed beads, freshwater pearls, and smaller gemstones. For lightweight stringing and bead weaving.
	.012 in (0.30 mm)		●	●	.012"/.013" Crystal beads, seed beads, freshwater pearls. Popular with beads with small holes.
	.013 in (0.33 mm)	●			
	.015 in (0.38 mm)	●	●	●	.015"/.018" Medium to heavy gemstones, crystals, seed beads, glass and metal beads. Most versatile sizes for making necklaces, bracelets and anklets.
	.018 in (0.46 mm)	●	●	●	
	.020 in (0.51 mm)			●	.020"/.021" Large or heavy gemstone beads with unevenly drilled bead holes. For stringing medium-weight designs.
	.021 in (0.53 mm)	●	●	●	
	.024 in (0.61 mm)	●	●	●	.024"/.026" Large or heavy beads with large drill holes such as African trade beads, glass or gemstones.
	.026 in (0.66 mm)			●	
	.030 in (0.76 mm)	●			.030"/.036" Large glass beads, medium to large crystals, chunky metal and heavy stone beads. Ideal for stringing larger, heavier beads.
	.036 in (0.91 mm)	●			

## Choosing Beadalon Findings

Wire Diameter mm	 Crimp Bead No.	 Crimp Tube No.	 Scrip® Finding	 EZ-Crimp™ Finding	 Wire Guardian™
.010 in (0.25 mm)	0, 1	1	Yes	Yes	1, 2
.012 in (0.30 mm)	0, 1	1	Yes	Yes	1, 2
.013 in (0.33 mm)	0, 1	1, 2	Yes	Yes	1, 2
.015 in (0.38 mm)	1	2	Yes	Yes	1, 2
.018 in (0.46 mm)	1	2	Yes	Yes	1, 2
.020 in (0.51 mm)	1	2	Yes	Yes	1, 2
.021 in (0.53 mm)	1	2	Yes	Yes	1, 2
.024 in (0.61 mm)	2, 3	2, 3	No	Yes	2
.026 in (0.66 mm)	2, 3	3, 4	No	No	2
.030 in (0.76 mm)	3	4	No	No	No
.036 in (0.91 mm)	3	4	No	No	No

## Design Tips for Using Beadalon Wires

- Use the largest diameter wire possible that will pass through the smallest bead hole in your design.
- Increase bead spacing. Spread contact with the wire over a greater area to reduce the effects of abrasion.
- Choose a wire with the proper breaking strength consistent with the weight and type of beads being used. The diameter of the wire is not always a good indicator of the strength.
- Choose the type of wire with the flexibility that will allow your design to look, feel, and drape the way you want.
- Use Wire Guardians to minimize the effects of abrasion at the clasp. (see photo at right).
- Use Scrip and EZ-Crimp for maximum connection strength.
- Use Bead Bumpers in between crystals and glass beads to cushion and protect beads from contact and wear and to protect abrasion on the wire.

### Standard Jewelry Lengths

• Bracelet	16 cm-17 cm (6.5"-7")
• Anklet	22 cm-25 cm (9"-10")
• Choker	38 cm-40 cm (15"-16")
• Princess Necklace	45 cm-50 cm (18"-20")
• Matinee Necklace	58 cm-68 cm (23"-27")
• Opera Necklace	71 cm+ (28"+)

# Attention Retailers

Did you know nearly all Beadalon products are sold in both Retail and Bulk packages?

Retail packages are designed to merchandise, or hang, on pegboard and slatwall displays, and include the products featured in our standard POG's. Retail packages have detailed consumer labeling and are sold in inner pack quantities that fit a 6 inch (15.24 cm) display peg. Simply open the inner pack, load the products on the peg, and there is no backstock. Bulk packages work well for the more traditional bead stores that prefer to sell loose items out of bins, or repack into smaller bags for resale. Regardless how your bead store or beading aisle may be set up, Beadalon has what you need.

Need help deciding which Beadalon products to sell in your store?

We can help! We have many profitable Plan-O-Gram (POG) solutions. Contact our Sales Department (1-866-4BEADALON or sales@beadalon.com) to help you create a custom POG featuring our top selling products designed to increase your sales and profits. You can purchase any of these product groupings as is, or modify them as you like.

## Retail Packaging Advantages

- Strong Beadalon brand recognition and advertising campaigns to drive sales.
- Compatible products create additional sales opportunities for you and helps create a self-shop stringing department.
- UPC labeling improves your inventory control and merchandising.

The special nylon coating on Satin Colors offers a soft, silky feel and a unique, matte coloring.

**49 Strand – Standard Colors**

49 Strand combines the flexibility and softness of thread with the strength and durability of stainless steel wire. Specially designed for stringing ceramic, crystal, metal, and stone beads - as well as seed beads and freshwater pearls - Beadalon 49 Strand is the softest and most flexible of all Beadalon varieties. Designs fashioned from Beadalon 49 Strand drape very naturally without kinking. Beadalon 49 Strand is the finest choice wire for creating jewelry designs that look professional and remain secure. The smooth nylon coating provides good abrasion resistance, prevents kinking, and prolongs strand life. Beadalon 49 Strand is so soft and flexible, you can knot it. Made in USA by Beadalon.

.925 Sterling Silver

#### 19 Strand - Solid .925 Sterling Silver

Soft, flexible, and pure .925 Sterling Silver. This wire is for the purist beader who requires the high flexibility of 19 Strand, in precious solid Sterling Silver. A thin, smooth, crystal clear layer of nylon gently covers this wire to prolong strand life and prevent kinking. The beauty of this fine wire is unsurpassed by any other beading wire on the market. Due to the extreme softness, we recommend reserving this .925 Solid Sterling Silver wire for your finest quality, most precious designs. For extended-wear designs, we recommend using our stronger, and more abrasion resistant Silver Plated 19 Strand or our value-priced silver plated wire, Silver Color 19 Strand.

### 19 Strand – Satin Colors

The special nylon coating on Satin Colors offers a soft, silky feel and a unique, matte coloring. Use this wire exposed as part of your jewelry, and with plated findings, for added elegance and beauty. Your crystal, gemstone, and glass beaded designs will look more elegant and feel as if they were strung on silk. Create designs with the lavish look of Silver, Gold, and Copper at a fraction of the cost. Made in USA by Beadalon.

### 19 Strand – Standard Colors

Specifically developed for bead stringing, Beadalon 19 Strand is an ideal choice for creating treasures with seed beads, freshwater pearls, and ceramic, crystal & stone beads. Only slightly more expensive than Beadalon 7 Strand, but much more flexible, this wire contains 19 strands of strong stainless steel. Nylon-coated for increased kink and abrasion resistance, Beadalon 19 Strand is easy to work with, super strong, and renders secure jewelry that lasts. Beadalon 19 Strand is also available in smaller diameters for crafting finer, more delicate pieces. Extra-supple Beadalon 19 Strand is the perfect stringing material for designing superior-quality anklets, bracelets, necklaces, earrings, and more. Made in USA by Beadalon. 

### 19 Strand – Bright

Good Kink Resistance

Excellent Strength

.925 Sterling Silver

### 7 Strand – Solid .925 Sterling Silver

Now you can retain the beauty of pure sterling silver throughout your entire design. Use this pure, solid .925 Sterling Silver beading wire with sterling components to make precious, classic jewelry. Seven strands of solid .925 Sterling Silver wire are stranded together, then covered with a smooth, clear nylon coating for increased abrasion and kink resistance. We recommend using this solid .925 Sterling Silver wire for your finer quality, more precious beaded jewelry. For added strength and abrasion resistance that extended-wear designs require, we suggest using our value-priced silver plated wire, Silver Color.

### 7 Strand – Solid .925 Sterling Silver

Clear nylon coating over .925 Sterling Silver wire

Actual Size	Diameter	Break	Crimp Tube	Crimp Bead	Part #
—	.015 in (0.38 mm)	7 lb (3.2 kg)	#2	#1	JW02STG-10FT
—	.018 in (0.46 mm)	7 lb (3.2 kg)	#2	#1	JW03STG-10FT

**7-Strand - Metallic Colors**

Metallic Colors reflect light and provide brilliant shine. These wires provide the appearance of precious metal, but without the cost. The 7 Strand construction holds its shape well and is good for general beaded designs. For increased flexibility and softness, we suggest using Beadalon 19 Strand Metallic Colors (p. 14). Made in USA by Beadalon.

## 7 Strand – Satin Colors **EXCLUSIVE!**

Satin Colors are wires nylon coated in soft, matte shades of Silver, Gold, and Copper. This value-priced colored bead stringing wire gives you the look of Silver, Gold, and Copper without the cost of plating or precious metal. The unique nylon color-coating provides your designs with added kink resistance, and works especially well for bracelets and other designs that require less drape. The wire beneath the coating is our dependable, 7 strand stainless steel that is stronger and more flexible than Tiger Tail. For better flexibility, kink resistance, and softness, consider using 19 Strand Satin Color (p. 14). Made in USA by Beadalon.

Spool Length Code: 0 = 30 ft (9.2 m) 1 = 100 ft (31 m) 8 = 1000 ft (305 m)

## 7 Strand – Clear Colors **EXCLUSIVE!**

Complement gemstone and glass bead colors with Beadalon 7 Clear Colors. This wire is nylon coated in translucent shades of Blue, Green, Pink, Purple, and Red. The nylon coating on Clear Colors allows light to pass through and reflect off the bright stainless steel wire for a spark of color that makes beaded designs come alive. Show a little or a lot of Clear Colors wire in your jewelry designs. Use this wire as a fun, out-of-the-ordinary design element. Sold individually and also available in six pack assortment. Made in USA by Beadalon.

### 7 Strand – Clear Colors

Translucent colored nylon coating over stainless steel wire

Actual Size	Diameter	Break	Crimp Tube	Crimp Bead	Color	Part #
—	.015 in (0.38 mm)	15 lb (6.8 kg)	#2	#1	Blue	JW02L-0
—	.015 in (0.38 mm)	15 lb (6.8 kg)	#2	#1	Green	JW02GR-0

### 7 Strand – Standard Colors

Softer than Tiger Tail and more supple for a smoother drape, Beadalon 7 Strand encases 7 strands of fine-diameter stainless steel wire within a kink-resistant nylon coating. It is abrasion resistant for longer lasting stringing results. Beadalon 7 Strand holds its shape, is easy to work with, very strong, and renders secure jewelry that lasts. Use Beadalon 7 Strand for most general beading and craft designs. Made in USA by Beadalon. 

### 7 Strand – Bright

Good for general beading projects, Beadalon 7 Strand is economically priced, far stronger than Tiger Tail, and has an excellent variety of sizes and colors.

Made in USA by Beadalon

# Memory Wire

ROUND

FLAT

Memory Wire is one of the easiest stringing materials to use. Because of its hard temper, it holds its shape. It is incredibly easy to finish-off as well - you can simply use a Round Nose Pliers or Memory Wire Finishing Pliers to turn the ends into a small loop, or choose from a variety of findings specifically designed to finish Memory Wire. Beadalon offers two types of memory wire:

**Remembrance Memory Wire** is stainless steel wire, made into coils, and sized for rings, bracelets, and necklaces. The diameters are given in ranges to account for the variations in the manufacturing process. Remembrance is the only stainless steel memory wire Made in the USA, by Beadalon, and is the highest quality available.

**Plated Steel Memory Wire** is a carbon steel wire that has been plated with silver, antique brass color, and gold color. It is made into coils, and sized for rings, bracelets, and necklaces. The diameters are given in ranges to account for the variations in the manufacturing process. This wire is ideal when you want the shimmer and shine of a plated wire.

**Memory Wire Shears**

Beadalon Memory Wire Shears come in three styles - designer, classic, and pocket sized. Specially designed for cutting hard wire, these shears feature hardened 90° jaws to slice effortlessly through spring-tempered wire. Shears leave a clean, safe-to-handle straight edge on Remembrance and Steel Memory Wire.

When cutting memory wire, use ONLY Memory Wire Shears. Any other tool will be damaged.

Beadalon uses the Brown and Sharpe (AWG) wire gauge standard for sizing Brass, Copper, and Stainless Steel wires.

### Binding Wire

Soft temper Stainless Steel Type 304 wire is perfect for holding parts together for soldering and plating. Use the smallest size (0.20mm/.008") for making twisted wire needles for stringing. This wire has a diamond die bright clean finish, and it will not contaminate pickling solutions. Made in USA by Beadalon.

Actual Size	Diameter	Spool Weight	Approx. Length ft	Part #
	.008 in (0.20 mm)	8 oz (226 g)	2,915	JB0080
	.010 in (0.25 mm)	8 oz (226 g)	1,965	JB0100
	.012 in (0.32 mm)	8 oz (226 g)	1,165	JB0125
	.016 in (0.41 mm)	8 oz (226 g)	725	JB0160
	.020 in (0.51 mm)	8 oz (226 g)	460	JB0200
	.025 in (0.63 mm)	8 oz (226 g)	297	JB0250

Use Binding Wire underneath it all to wrap and tighten components.

**EXCLUSIVE!****Round, 1/2 Round, & Square 316L Stainless Steel Wire**

Made of Type 316L Stainless Steel, this specially tempered wire has a unique feel compared to other half-hard materials such as Gold-filled or Sterling Silver, and is stronger. Available in classic Round, 1/2 Round, and Square shapes necessary for wire-wrapping. Ideal for all types of wire-wrapping, weight-bearing designs, and binding designs together. Stainless Steel is hard and will work harden faster than other wires, and resembles the finish of vintage platinum. Made in USA by Beadalon.

**26 Gauge T316L Round Wire & Raw Black Diamonds****WIRE SHAPES - SUGGESTED USES****Round**

Used for open and closed loop wire wrapping, twisting, coiling, wire forming, and flattening.

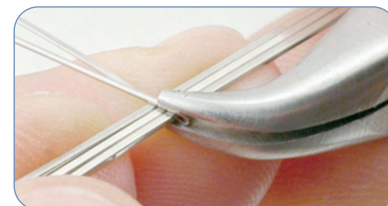

**1/2 Round**

Primarily used for banding around square wire. It can also be used for covering round wire, either with the curved or flat side out.

**Square**

Typically used as the base of wire wrapped designs to hold stones that are banded together with 1/2 Round wire. Banding can also be done with Square wire

*1/2 Round and Square Wires are the cornerstone of component and stone setting.*

*T316L Stainless Steel resembles the look of vintage platinum.*

**GERMAN STYLE WIRE VS. 316L STAINLESS STEEL**

316L Stainless Steel should be used for its color and where structural strength is necessary. 316L Stainless Steel is much harder than German Style wire - even the smallest gauges of wire are extremely strong and make it possible for an experienced wire wrapper to achieve different structural ideas. The look and durability of 316L Stainless Steel is a big draw for experienced wire artists.

## German Style Wire - Round

German Style Wire is excellent quality shaping wire, available in several gauges and shapes, and has the perfect medium temper and finish for most jewelry wire wrapping uses. All German Style Wires are tarnish-resistant coated copper, with the exception of gold color, which is tarnish-resistant brass.

# Artistic Wire®

## Standard Colors

Artistic Wire is available in the largest selection of colors and gauges, and in the widest range of packaging choices. Choose colors that complement one another to achieve warm, colorful designs. Or, make a statement and add drama to your designs by using contrasting colors. The only limit in working with colored wire is your imagination.

For design help and instructions, please refer to our website or conveniently scan the QR code.

### Artistic Wire® Standard Colors By Gauge

Color No.	Color	10 Gauge	12 Gauge	14 Gauge	16 Gauge	18 Gauge	20 Gauge	22 Gauge	24 Gauge	26 Gauge	28 Gauge	30 Gauge	32 Gauge	34 Gauge
01	Aqua

SS	Stainless Steel**													
BC	Bare Copper*													
AC	Antique Copper*													

UNCOATED

\* Bare Copper and Antique Copper do not have a tarnish resistant coating. These wires will patina, or naturally oxidize and darken with time, to provide a vintage look.

\*\* Stainless Steel is T304 Stainless Steel, not copper. Choose Grey if looking for stainless steel color in a copper wire.

 = Blank area means color is **NOT** available in that gauge

Beadalon uses the Brown and Sharpe (AWG) wire gauge standard for sizing Brass, Copper, and Stainless Steel wires.

The Largest Selection of Colors & Gauges!

# The Largest Selection of Vibrant

## Silver Plated Colors & Gauges!

### Silver Plated Colors

Artistic Wire is available in the largest selection of exclusive Silver Plated colors and gauges that offer striking beauty and shine. These wires are made by first plating the copper wire with a precision layer of pure silver. Then we carefully apply our unique enamel color and tarnish resistant coating on top of this silver plating. The silver plating beneath the color adds an incredible high-shine and brilliance to the wire. Although the color swatches on this page give you a hint of these colors, they cannot capture the actual beauty and intensity that these Silver Plated wires exude.

For design help and instructions, please refer to our website or conveniently scan the QR code.

Artistic Wire Hue and Tint

Artistic Wire colors are very consistent, though perfect color matching is not always possible. When comparing different gauges of the same color Artistic Wire, some color variation may be noticeable. Some Artistic Wire hues have a tint range within  $\pm 10\%$ , which we consider acceptable.

### Artistic Wire - MultiColor **EXCLUSIVE!**

The Artistic Wire MultiColor wires incorporate a repeating pattern of 3 colors to create a beautiful ombré pattern. Use this effect to create beautiful groupings of color with herringbone or conventional wire wrapping. Also looks fantastic in coiled wire beads.

Gauge	Diameter inch	Diameter mm	Colors	Coil Pack Length	Part Number
20	.032	0.81	Red/Gold/Black	4 yd (3.6 m)	AWD-20-81-04YD
20	.032	0.81	Silver/Gold/Black	4 yd (3.6 m)	AWD-20-82-04YD
20	.032	0.81	Silver/Black/Green	4 yd (3.6 m)	AWD-20-83-04YD
20	.032	0.81	Pink/Black/Green	4 yd (3.6 m)	AWD-20-85-04YD
20	.032	0.81	Blue/Red/Gold	4 yd (3.6 m)	AWD-20-86-04YD
20	.032	0.81	Brown/Green/Gold	4 yd (3.6 m)	AWD-20-88-04YD

Three bold colors are combined in a repeating gradient pattern to create this gorgeous wire!

- 3 Colors In One Wire
- Creates a Beautiful Ombré Effect
- Use For Wire Wrapping, Coiled Wire Beads and More

**Twisted Artistic Wire *EXCLUSIVE!***

Give your designs a twist with Artistic Wire Twisted! Three strands of Artistic Wire are twisted together to make a truly unique textured wire. Use this wire in your designs to add an interesting appearance and feel. Feature Artistic Wire Twisted in your next design to make a statement and add drama.

Gauge	Diameter inch	Diameter mm	Dispenser (AWD) Pack Length	Tarnish Resistant Retail (AWS) Spool Length	All Other Colors Retail (AWS) Spool Length

**Aluminum Craft Wire**

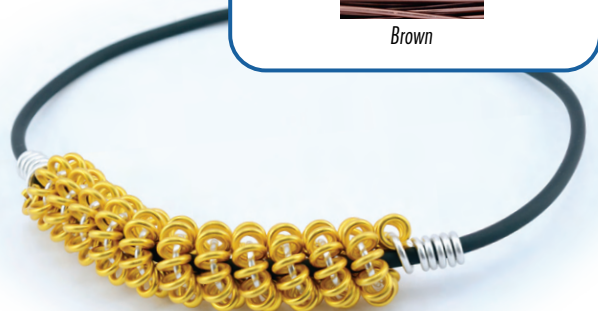

Aluminum Craft Wire is another great option for larger format designs. This naturally soft tempered, 12 gauge enamel coated aluminum wire is ideal to use with the 3D Bracelet Jig and the Really Big Jig to create beautiful cuff bracelets, or you can use this wire with the Conetastic Tool to make color coordinated necklace cones and anywhere you need a light weight, heavy gauge, thick wire that is easy to bend.

**Flat Artistic Wire**

Use this versatile tarnish resistant flat copper wire to create spirals and twists, or bend it into all kinds of shapes to create dangles, drops, bracelets, rings and even home décor items. Incorporate round Artistic Wire for a colorful design with lots of texture. These wires have a copper core with tarnish resistant color coating and are stronger than flat aluminum wire.

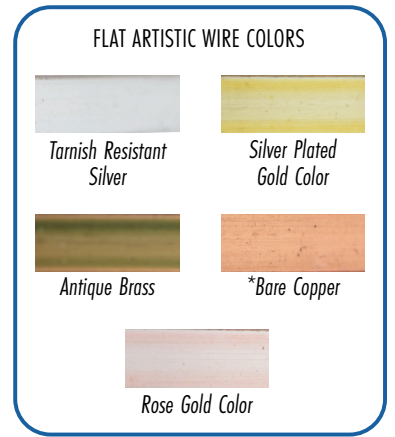

Size mm	Size Inch	Color	Coil Pack Length	Part Number
3.0 x 0.75	0.12 x 0.03	Tarnish Resistant Silver	3 ft (0.91 m)	AWB-21F-S10-03F
3.0 x 0.75	0.12 x 0.03	Silver Plated Gold Color	3 ft (0.91 m)	AWB-21F-S03-03F

5.0 x 0.75	0.19 x 0.03	Tarnish Resistant Silver	3 ft (0.91 m)	AWB-21F5-S10-03F
5.0 x 0.75	0.19 x 0.03	Silver Plated Gold Color	3 ft (0.91 m)	AWB-21F5-S03-03F
5.0 x 0.75	0.19 x 0.03	Antique Brass	3 ft (0.91 m)	AWB-21F5-24-03FT
5.0 x 0.75	0.19 x 0.03	*Bare Copper	3 ft (0.91 m)	AWB-21F5-BC-03FT
5.0 x 0.75	0.19 x 0.03	Rose Gold Color	3 ft (0.91 m)	AWB-21F5-S21-03F

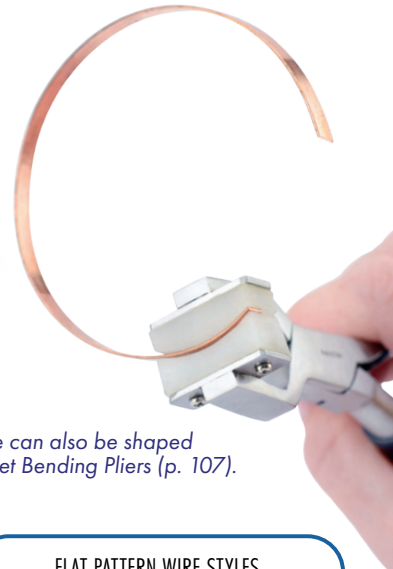

\*Bare Copper does not have a tarnish resistant coating and will patina, or naturally oxidize with time, to provide a vintage look.

Flat Artistic Wire is sold in 3 ft (0.91 m) coils.

Use a hammer to imprint texture into Flat Artistic Wire, or try and create interesting shapes using mandrels.

Flat Artistic Wire can also be shaped using the Bracelet Bending Pliers (p. 107).

**Flat Pattern Artistic Wire**

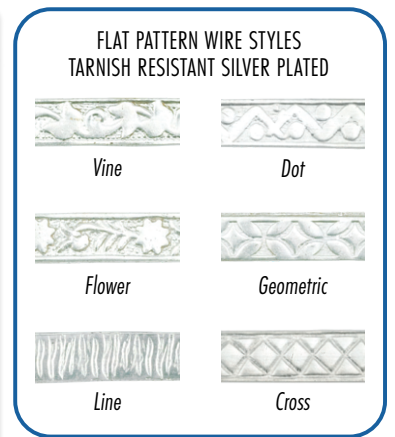

These 6 in (15.24 cm) pieces of Flat Patterned Wire are the perfect length to use as a foundation for a cuff or bangle bracelet. Use the Bracelet Bending Pliers (p. 107) to bend it into a curved shape, punch holes with the Hole Punch Pliers (p. 104) to add dangles, or use it to bezel around a thick cabochon. This beautiful, versatile, copper core wire measures 4.6 x 0.58 mm (0.20 x 0.03 in).

Width mm	Width Inch	Pattern(s) Per Pack	Tarnish Resistant Color	Length Inch (cm)	Pieces Per Pack	Part Number
